TERMITE-RESISTANT WOOD

Prevents damage from
termites, rot and fungal decay.

Interior & exterior
applications.

Use the same
hardware &
fasteners as
untreated wood.

How Valuable is Consistent Quality?

At SILVASTAR, we think it's the
most important question.

For most of us, value is expressed as the
combination of price, quality, and service.
We believe that while price gets you in the
door, quality and service keep you on the job.

Price vs. Quality

We believe that our customer's customer
won't lose a job on the price of a fascia and
trim package, but that same customer may
not let you bid their next job if the quality of
that trim package was subpar.

What you see is what you get.
The trim package is the finishing touch.
It gets noticed and it sends a message.

What message do you want to send?

FUNGAL DECAY AND
TERMITE-RESISTANT WOOD

Consistent quality at a fair price you and your
customer can count on, every time.

FASCIA • TRIM • DECKING • SIDING • LOG CABIN SIDING • PATTERNS • FURRING STRIPS

Why FrameGuard® Treated Wood?

FrameGuard® Total™ mold and decay resistant wood prevents mold problems - as well as damage from termites and fungal decay - in trusses, framing, OSB, wood I-beams, SIPs, and other wood products used in interior applications. It is also suitable for exposed applications when coated with approved primer and exterior paint.

FrameGuard® treated wood stays cleaner and brighter during storage and construction, thus precluding dissatisfaction and exchanges. Plus, homeowners get a mold-resistant product giving them greater peace of mind.

FrameGuard® treated wood has been selected for the GreenSpec® directory of environmentally preferable products.
